

Medela Symphony PLUS[®] Breast Pumps + Kits

Providing access to hospital-grade technology helps make returning to work and continuing to breastfeed seamless and easy for moms. Equipping your lactation space with Symphony PLUS is a great way to show that your company cares about and supports working moms who want to provide breast milk for their babies.

Why moms (and hospitals) love Symphony PLUS Breast Pumps:

✓ Intelligent

2-Phase Expression[®] technology, found only in Medela breast pumps, imitates the natural sucking behavior of babies.

✓ Efficient

Pumps more milk in less time while maintaining breast milk supply when not able to directly breastfeed¹

✓ Powerful

Multi-user breast pump designed for 1000s of hours of operation that produces breast milk with higher energy content (as measured by cream content).¹

✓ Safe

Closed system breast pump features a protective membrane, which prevents breast milk overflow. A user-friendly exterior with a single knob for adjusting vacuum and speed makes the breast pump easy to clean.

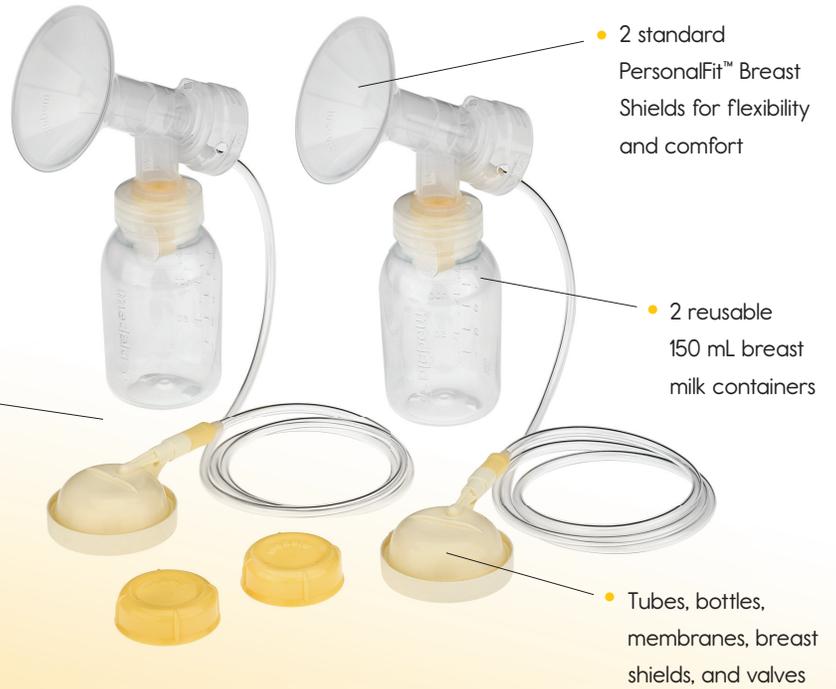

✓ Discreet

Whisper-quiet operation reduces the worry of disturbing others while pumping at work.

Symphony PLUS® Double Pumping Kit

Everything mom
needs to start
pumping:

Available in 6-pack
case quantities

How it works:

Symphony PLUS Breast Pumps are designed to be used by multiple moms, which makes them a great option for the workplace. Pumping kits are provided to each mom and provide everything she needs to start pumping with Symphony PLUS. This eliminates the need to transport a personal-use breast pump to work and back each day—and gives moms one less thing to worry about.

Symphony PLUS is by far the best pump on the market. It's fast, effective, and without any milk left behind. I would recommend this pump to all my friends.
– Anna M, Miami Beach, FL
